USGA Regression Method

Compares the tied players from the back nine (holes 10–18), then the last six (13–18), then the last three (16–18), and finally the 18th hole. For net awards, the handicap strokes that actually fall on those holes (by each hole's stroke index) are deducted. The flight's gross winner is determined first as the outright low score and is then excluded from the net award.
